YOUR COMPANY
NAME HERE

EVEN IF YOUR POOL is just a few years old, you might be surprised at how many new ideas and technologies there are now available to improve the experience of running and enjoying your own swimming pool.

Your pool is an important part of your lifestyle and we are sure that you value the contribution it makes to the health and the leisure time of you, your family and your friends.

WOULDN'T IT BE EVEN BETTER if you could keep all those benefits but spend a bit less of your time, perhaps even a bit less money, on maintaining and running your pool?

To help you achieve that, we have put together a range of exciting new ways to reduce running costs and make your pool more environmentally friendly.

We've included some ways of bringing the 'look' of your pool up to date or just to make it more fun.

Everything in this collection can be fitted to your existing pool with minimal disruption and we are sure that each and every one of them will help improve the experience of owning your pool.

HELPING THE
ENVIRONMENT.

POOL COVERS.

DEL pool covers keep your pool safe and secure as well as helping to cut running costs.

Their automatic slatted covers are a 'push-button' cover that will retain heat and make your pool safer plus, they can be solar powered.

If you already have a slatted cover, perhaps the slats need upgrading or replacing? DEL replacement slats are suitable for most automatic pool cover systems.

Slats are available in white, beige, blue and grey or there is a solar option to improve solar gain and save energy costs.

MULTICYCLONE.

A MultiCyclone unit works as a pre-filter between the pump and the main filter.

It requires no power and has no moving parts but generates a centrifugal current inside the unit that spins out and traps particles before they can reach the sand filter.

A MultiCyclone can save you energy as you have to run the pump less and, as the sand filter has to be backwashed much less often, it can also save you as much as 7,000 litres of water a year while also helping cut your chemical bill.

**HELPING TO
SAVE YOU
MONEY.**

LED LIGHTING.

LED lighting is the most energy efficient lighting option available.

Spectravision lights can also be digitally controlled to produce an amazing range of mood-lighting effects that will transform the look and atmosphere of your pool at night.

HEAT PUMPS.

A heat pump is one of the most efficient options available for heating your pool water.

DURA heat pumps actually multiply the amount of heat that can be produced from each kWh of electricity by drawing warmth from the air to put into your pool.

WATER TREATMENT.

One of the most cost effective and environmentally friendly water treatment systems available today, the Triogen TR2 uses ultraviolet light to kill 99% of water borne organisms and reduce the need for chlorine.

Triogen UV water treatment is becoming increasingly popular and pool owners with indoor or covered pools in particular will enjoy the absence of any chlorine smells in their poolroom's air.

SAVING YOU
TIME SPENT
ON POOL
MAINTENANCE.

AUTOMATIC POOL CLEANERS.

Would you believe that cleaning your pool could be easy? In fact, it can even be fun.

Suction cleaners are easy and efficient to use, electric powered cleaners will almost do the job for you and we have a Dolphin model that will clean the entire pool and even climb the walls to scrub the waterline.

AUTOMATIC CHEMICAL DOSING.

A complete package of equipment provides simple and reliable dosing and control for chlorine or pH.

Maintaining water quality is the most important aspect of looking after your pool and it takes regular time and effort. By automating the process the water management of your pool becomes efficient and effortless.

Etatron offer equipment packages to suit a range of pool sizes and budgets all of which provide simple and reliable dosing and control for chlorine or pH.

**FEELING GREAT.
LOOKING GOOD.**

COUNTER CURRENT UNITS.

Boost your fun and exercise regime with a BADUJet counter current unit. Counter current units not only make a smaller pool more suitable for swimmers, they also offer bathers the option of a relaxing massage after a vigorous workout.

COPING STONES AND PAVING.

Replacing the paving around your pool can dramatically update its whole appearance.

Senlac Stone not only offers you a range of safe and textured surfaces to choose from but also, uniquely, gives you the opportunity to replace the pool coping with exactly the same material to give your pool a modern, seamless look.

TALK TO US.

Whether you have owned your pool for just a few years or whether it feels like it has been a part of your life as long as you can remember, the products we have put together in this brochure will help you enjoy it even more.

Talk to us about how you would like to improve your pool, and we can suggest which product, or group of products, will help you achieve that. Your pool represents a big investment. We just want to help you get the most out of it.
